

## CHAPTER V

### CONCLUSION AND SUGESTION

Based on the results of the research and discussion above, it can be drawn the following conclusions.

#### 5.1 Conclusion

1. The first, Affective is the Negative response of students about students prefer learning using Google Classroom rather than face to face, most of students choose learning face to face than learning using Google Classroom because by learning face to face students easily to understand the material given by the lecturer.

The second Conative is the Negative response about Google Classroom allows students to get feedback more quickly, of students choose disagree because students don't get feedback quickly using Google Classroom, students get quickly feedback when learning face to face.

2. The Cognitive responses is positive response about what do you know about Google Classroom. Based on the students response from this interview, Google Classroom is a good application for e-learning because easier to used and easy to access. Google Classroom is useful for assessing assignment without having to meet face to face. It can be concluded, Google Classroom is a good application for e-learning.

## 5.2. Suggestion

Based on the conclusion of the study, the researcher would like to give some suggestion as follows:

### 1. Lecturer

Lecturer must learn more about how utilize Google Classroom effectively as a media in online learning, as well as how to appropriate Google Classroom for students and apply it to them. As a result, their abilities and skills have improved as well as their professional development.

### 2. For Students

Students are expected to be more independent and not lazy in understanding what is conveyed or explained by the lecturer by using Google Classroom as a media in online learning, even if it is only in textual form. Students are expected to make more use of their study time and explore more of the benefits each Google Classroom used so that it becomes a more insightful value.

### 3. For the next researcher

For the future researcher who want to conduct similar research can be used this as a reference for their research. Further researcher can also develop various topics related to on the use of Google Classroom as an online learning media such as the factors that effect response of Google

Classroom used in online learning, students response of Google Classroom efficiency in their online learning.

## **APPENDICES**

Researcher: Assalamualaikum, good morning!

How are you today? I hope everything will be fine.

Irawan: waalaikumssalam, I'm fine. Thank you!

Researcher :So here, I will give some question related to online learning using Google Classroom to find out students response on the use of Google Classroom at the fourth semester.

Irawan : Okay.

Researcher : What do you know about Google Classroom?

Irawan : Google classroom is one of the online learning media.

Researcher : How are the students response on the use of Google Classroom as a media in online learning?

Irawan : For me Google Classroom is a good application to use in online learning process, even though is less effective but Google Classroom is a good application.

Researcher : Does the students have difficulty to accessing learning material in Google Classroom? Why?

Irawan:No, because when the lecturer gives us the material we have a notification via email and the material is directly accessible to our Google drive.

Researcher : Does the students are able to understand the material provided through Google

Classroom? Why?

Irawan : For me, is very difficult to understand maybe we have a material but there is no

Explanation from the lecturer because there is no directly communication via Google Classroom.

Researcher : Does the Google Classroom has a positive effect? Why?

Irawan :I don't know that but for me no because we have a material but there is no

Explanation There is no directly communication between students and lecturer.

Researcher : okay, thank you for answering my question.

Irawan : Okay.

Researcher :Assalamualaikum, good morning!

How are you today? I hope everything will be fine.

Agieq :Good morning and I wish you the same thing.

Researcher :So here, I will give some question related to online learning using Google Classroom to find out students response on the use of Google Classroom at the fourth semester.

Agieq: Okay.

Researcher : okay, for the first question, what do you know about Google Classroom?

Agieq : Google Classroom is online learning platform from google that provided people with online class with variety of features that easy to used or access maybe.

Researcher : How are the students response on the use of Google Classroom as a media in online learning?

Agieq : for me personally it's reasonable decision because students need the other sources of lecture design face to face lecture

Researcher : Does the students have difficulty to accessing learning material in Google Classroom? Why?

Agieq : In my personal opinion, in general Google classroom itself is easy to use the main

Problem is connections or the signal strength from the provider therefore because

of that we can't totally access the website.

Researcher : Does the students are able to understand the material provided through Google

Classroom?Why?

Agieq: Again for me personally it's the same thing with reading article online books or any other literature no difference is the same thing.

Researcher : Does the Google Classroom has a positive effect? Why?

Agieq : In my opinion not much actually because if it compare with online learning there is no dialog, no direct conversation therefore some students have no spirit, no passion or in bahasa we could say gairah from the discussion in google classroom.

Researcher : okay, thank you for answering my question.

Agieq : you're welcome and again I wish you the same thing and have a nice day.

Researcher :Okay, assalamualaikum. Good morning! How are you?

Indah :waalaikumssalam, I'm okay

Researcher : So here, I will give some question related to online learning using Google Classroom to find out students response on the use of Google Classroom at the fourth semester.

Indah : yes, please!

Researcher : for the first question, what do you know about Google Classroom?

Indah : Google classroom is one of the application that used in online learning.

Researcher : How are the students response on the use of Google Classroom as a media in online learning?

Indah : in my opinion google classroom makes the students easier to send the assignment and easy to access and easy to used

Researcher : Does the students have difficulty to accessing learning material in Google Classroom? Why?

Indah : I think the problem is connections because without the good signal we cannot access the google classroom.

Researcher :: Does the students are able to understand the material provided through Google

Classroom? Why?

Indah : I think no because there is no explanation from the lecturer

Researcher : Does the Google Classroom has a positive effect in learning performance? Why?

Indah : I think have a positive effect because without google classroom application in the

Pandemic covid-19 learning can be done.

Researcher : thank you for answering my question.

Researcher :Assalamualaikum. Good morning! How are you?

Ahmad :Walaikumssalam, Good morning too! I'm okay this morning.

Researcher : So here, I will give some question related to online learning using Google Classroom to find out students response on the use of Google Classroom at the fourth semester.

Ahmad : yes!

Researcher : for the first question, what do you know about Google Classroom?

Ahmad : Google Classroom is a application that is used to send assignment or as a media in online learning.

Researcher : How are the students response on the use of Google Classroom as a media in online learning?

Ahmad : in my opinion, Google Classroom is a good application because easy to use and save the time.

Researcher : Does the students have difficulty to accessing learning material in Google Classroom? Why?

Ahmad : For me, the main problem is the connection or signal strength.

Researcher : Does the students are able to understand the material provided through Google

Classroom? Why?

Ahmad : my opinion, we can't understand the material because there is no explanation from

The lecturer.

Researcher :Does the Google Classroom has a positive effect in learning performance

Ahmad : I think there is no effect because we have material but there is no explanation about

The material.

Researcher : thank you for answering my question. I hope you are always happy and healthy.

Ahmad : yes, you're welcome.

Researcher :Assalamualaikum. Good morning! How are you?

Resty :walaikumssalam. I'm fine.

Researcher : So here, I will give some question related to online learning using Google Classroom to find out students response on the use of Google Classroom at the fourth semester.

Resty : yes, you can start right now.

Researcher : what do you know about Google Classroom?

Resty : Google classroom is one of the online media we often used in learning process because it's easy to used.

Researcher : How are the students response on the use of Google Classroom as a media in online learning?

Resty: For me google classroom is the best application, because we can access in anywhere, easy to use and save our time.

Researcher : Does the students have difficulty to accessing learning material in Google Classroom? Why?

Resty : I think it's easy to access because we have a notification via email.

Researcher : Does the students are able to understand the material provided through Google

Classroom? Why?

Resty : in my opinion, it's hard to understand because the lecture just send the material

And there is no direct communication with students and lecturer.

Researcher : Does the Google Classroom has a positive effect in learning performance.

Resty : Not much effect because there is no communication between students and lecture.

Researcher : thank you for answering my question. I hope you are always happy and healthy.

Researcher :Assalamualaikum. How are you today?

Fira :Waalaikumsalam. Today I'm fine.

Researcher : So here, I will give some question related to online learning using Google Classroom to find out students response on the use of Google Classroom at the fourth semester.

Fira : Yes, please!

Researcher : what do you know about Google Classroom?

Fira : As for what I know about the Google Classroom application, it is an application that is used to send assignment or learning application that are useful for for assessing an assignment and without having to meet face to face.

Researcher : How are the students response on the use of Google Classroom as a media in online learning?

Fira : My response to this Google Classroom application is that this application is slightly useful for students who are doing online learning today because this application helps and makes it easier for students to send assignments without using a lot of data or quota and compared to other applications which are quite draining.

Researcher : Does the students have difficulty to accessing learning material in Google Classroom? Why?

Fira : In my opinion, using the Google Classroom application there are also times that are not too difficult. Why is it because this application does not use too much quota and in my opinion it may also be too difficult if experienced by students who maybe limited with internet access or quota.

Researcher : Does the students are able to understand the material provided through Google

Classroom? Why?

Fira : I think there is something they understand and there is also something they don't understand about the materials send by the teachers and the lecturers. Why because I think before the material is sent to students, a student has to get a little understanding that the teacher gives because before someone understands it will something a person must have an understanding of something then he will understand and know it and so is the learning material before a student understands the material a teacher must give a little understanding of the material and then the students will understand a little about the material the teacher sends through the application this.

Researcher :Does the Google Classroom has a positive effect in learning performance.

Fira : The positive thing is that by using this application it is easier for students to send

Their assignment without having to meet face to face to this covid the teacher are

Also helped this application.

Researcher :Assalamualaikum. Good morning! How are you today?

Mariati: morning, I'm good and how about you?

Researcher : yes, I'm good too.

So here, I will give some question related to online learning using Google Classroom to find out the students response on the use of Google Classroom at the fourth semester.

Mariati : yes, you can start it.

Researcher : What do youknow about Google Classroom?

Mariati : I think Google Classroom is a good application because very easy to use and we can access in everywhere

Researcher : How are the students response on the use of Google Classroom as a

media in online learning?

Mariati: For me Google Classroom makes students, teacher and lecture easy to send the assignment and collect the assignment.

Researcher : Does the students have difficulty to accessing learning material in Google Classroom? Why?

Mariati : I think there is no problem because it's depend on our connections if our connection is good so our online class will be good too.

Researcher : Does the students are able to understand the material provided through Google

Classroom? Why?

Mariati : I think they are really hard to comprehend because when the lecture or the teacher send the material on the Google Classroom there is no explanation about the material.

Researcher : Does the Google Classroom has a positive effect in learning performance?

Mariati : My opinion there is no positive effect because we have a material without explanation from the teacher or the lecture so we will not understand the material.

Researcher : thank you for your answer.

Researcher : Assalamualaikum. How are you?

Yustiawan : yes, I'm good today.

Researcher : So here, I will give some question related to online learning using Google

Classroom to find out the students response on the use of Google Classroom

At the fourth semester.

Yustiawan : yes, please.

Researcher : what do you know about Google Classroom?

Yustiawan : Google Classroom is a free web based platform create to facilitator learning

Activities of teacher and students without meeting face to face.

Researcher : How are the students response on the use of Google Classroom as a media in online learning?

Yustiawan : Google Classroom of course makes it easy for teacher and student to give

Assignment and collect assignment even in giving material but of course it is not

Effective as faceto face.

Researcher :Does the students have difficulty to accessing learning material in Google

Classroom?

Yustiawan : In terms of accessing material on Google Classroom of course there are no

Problem as long as our network is good.

Researcher :Does the students are able to understand the material provided through Google

Classroom? Why?

Yustiawan : I think in general they can't understand the material they are reading but more in

Deep explanation is needed on another platform because it is cannot be done in

Google Classroom.

Researcher : Does the Google Classroom has a positive effect in learning performance?

Yustiawan : yes of course, because makes it's very easy for student and teacher provide material

Or collect assignment wherever and wherever.

Researcher : Thank you for your answer.

Yustiawan : okay. You're welcome.

Researcher :Assalamualaikum. Good morning! How are you?

Riad : Waalaikumssalam. Good morning! I hope you fine too.

Researcher : So here, I will give some question related to online learning using Google

Classroom to find out the students response on the use of Google Classroom

At the fourth semester.

Riad : yes, sure.

Researcher : what do you know about Google Classroom?

Riad: Google Classroom is an application that makes e-learning process it's easier.

Researcher : How are the students response on the use of Google Classroom as a media in online learning?

Riad : It makes the students easier to submitted assignment and absent.

Researcher : Does the students have difficulty to accessing learning material in Google Classroom?

Riad : Maybe what makes difficult is the signal during you used the application because

Because without good signal you can't access the Google Classroom applications.

Researcher : Does the students are able to understand the material provided through Google

Classroom?

Riad : I think I can because Google Classroom easy application to access and used.

Researcher : Does the Google Classroom has a positive effect in learning performance?

Riad : yes because the Google Classroom makes the learning process is more interesting

Not bored and practical.

Researcher : Thank you for your answer.
