

## **CHAPTER V**

### **CUNCLUSION AND SUGGESTION**

The final chapter, Page V, presents the research's results and the conclusions and recommendations that the authors want to share with educators, students, and other researchers in the future..

#### **5.1 Conclusion**

So, the conclusion of the research related to It can be inferred from the discussion in chapter IV that SMP N 2 Labuapi eighth-grade students will use phrase repetition strategies during the school year 2021–2022.

1. Sentence reconstruction techniques in learning to write is effective to use because all students are involved in group work so that no group members are noisy and do not disturb friends in one group or another group who are completing the tasks given by the teacher.
2. Data analysis from the calculation results of hypothesis testing with the help of the SPSS 20.00 program to use the Independent Sample T-Test test technique at a significance level of 5%, the arithmetic value of table (6.064 2.024), and the si value was 0.05 (0.000). 0.05). Then there is a significant effect of using reconstruction techniques on the writing of class VIII students of SMPN 2 Labuapi for the 2020/2021 academic year.

#### **5.2 Suggestion**

Based on the conclusion, the writer would like offering or posing some suggestions as follows:

To the teacher, as a teacher of English as a foreign language supposes to know the various techniques in teaching and learning so as to choose suitable technique for appropriate materials in implementing them in the classroom. The teacher also can employ this technique as alternative technique in teaching English. The teacher was expected to be more creative presenter in order for increase the students' enjoyment, efficiency, and comfort in the teaching and learning process.

To the student, students must understand that there are two processes involved in learning. that is, learner center and teacher center. It means that it was not only the teacher active in the class but students also. The students have to well-read to have more knowledge. The students also have to use the time as efficient as possible. Discussion was a better way to cope the problem.

To the next researcher, this technique can be used as a previous study to complete the study that was researched. This thesis was also far from the perfection, therefore, critics and advises from the readers were really expected by the writer. The writer finally hoped that this thesis was useful for all of us.

Yopi : Oh, really? I hope you are not coming with another lie anymore

Erlita : Wow, you look so serious. What kind of news is that?

Ferdi : Oh, please... I'm telling real news right now. Last night, I saw a mysterious flying object on the night sky. You may be familiar by calling it UFO

Yopi : See... here you go with your lies again

Erlita : UFO? Do you mean it's like an alien's spacecraft?

Ferdi : Yes...! Yes...! Oh, come on! I am not joking around, Yopi. It's real. I saw it clearly with both of my eyes.

Erlita : Well, what did it look like?

Ferdi : Just like you've ever seen in movies, it looked like a spacecraft. It floated around the sky. There were many colorful lights on it.

Erlita : Did it move so fast? How could you see it with your bare eyes?

Ferdi : No, it didn't move so fast. Therefore, I could see it clearly with my both eyes.

Erlita : Was it huge?

Ferdi : I am not really sure. But, I think it was a little bigger than a helicopter.

Erlita : Did it emit sound?

Ferdi : No, I guess. It was so silent.

Yopi : You could have been mistaken. Maybe it was an airplane. Did you use any tool to see it? Like telescope or binocular?

Ferdi : I am extremely sure that it wasn't an airplane. I know exactly how an airplane looks like. It was really a different one. No, I didn't use my binocular. It was clear enough to see with bare eyes.

Yopi : Did you take a photo of that flying object?

Ferdi : Unfortunately, when I was going to grab my digital camera, it disappeared.

Yopi : Well, with no strong proof I cannot fully believe in your story

Ferdi : Oh, come on, Yopi.

### Practice

Randall : Do you know what a grandfather clock is?

Horace : Yes, of course.

Randall : I assume it is a kind of clock, but what does it look like?

Horace : **Well, they're usually big, about an average person's height, and maybe 20 to 24 inches wide.**

Randall : And.

Horace : The clock face is at the top, usually a round face, and many have Roman Numerals.

Randall : Go on.

Horace : **Below the face is a pendulum which hangs from a chain, or something similar, which swings back and forth as the clock ticks.**

Randall : I'm sorry, what's a pendulum?

Horace : A weight hanging from a chain, cable, or string.

Randall : I see.

Horace : **In all the grandfather clocks I have ever seen, the cabinets were made out of wood, usually stained brown.**

Randall : Why are they called grandfather clocks?

Horace : I don't know. Maybe because they are an old style of clock that was common in our grandfathers' days.

Randall : The clock in your father's office is a grandfather clock, isn't it?

Horace : Yes, but he calls it his grandmother's clock.

Randall : Why?

Horace : Because his grandmother gave it to him.
