### BAB V

### **PENUTUP**

### 5.1 Kesimpulan

Setelah melakukan penelitian pengaruh hambatan samping terhadap kinerja ruas jalan dengan berdasarkan pada metode MKJI 1997 dapat disimpulkan bahwa:

- Pengaruh hambatan samping yang terjadi pada sisi atau ruas Jalan Gajah Mada bisa dinyatakan cukup besar, karena berdasarkan dari analisa hambatan samping, volume hambatan samping yang terjadi pada ruas timur dan barat menunjukkan angka 620 dan 553 pada jam puncak masing-masing, sehingga kecepatan kendaraan dibatasi & kinerja lalu lintas pun ikut terganggu.
- 2. Dikarenakan kelas hambatan samping yang tinggi dan volume lalu lintas yang padat (hampir mendekati kapasitas jalan), maka kinerja ruas jalan pada Jalan Gajah Mada pun menunjukkan tingkat pelayanan jalan kelas D pada ruas timur dan kelas E pada ruas barat.

### 5.2 Rekomendasi Penanganan

Berdasarkan kondisi di lapangan dan data yang diperoleh dari survey, jenis hambatan samping yang paling banyak terjadi & mempengaruhi tingkat pelayanan jalan adalah kendaraan parkir di badan jalan dan kendaraan keluar masuk di sisi jalan, oleh karena itu rekomendasi penanganan yang tepat untuk mengurangi pengaruh hambatan samping tersebut adalah :

- Mengingat di lokasi tidak tersedia tempat parkir khusus dan parkir di badan jalan menjadi alternatif, maka untuk mengurangi pengaruh kendaraan parkir di badan jalan, diperlukan satu sistem penataan parkir yang terpadu agar tidak terjadi penumpukkan kendaraan parkir pada satu area dan sesuai dengan ruang parkir yang tersedia.
- 2. Diberlakukannya larangan untuk parkir di badan jalan pada jam-jam puncak
- 3. Untuk mengurangi pengaruh hambatan akibat kendaraan keluar dan masuk pada sisi jalan, diperlukan adanya rambu-rambu yang tepat atau petugas yang bisa mengatur lalu lintas di sekitar koridor

### 5.3 Saran

Berdasarkan kesimpulan diatas maka penulis mencoba untuk memberikan masukan dari sumber literatur yang dikutip yang mungkin bisa digunakan bahan pertimbangan bagi instansi terkait dalam usaha pemeliharaan jalan tersebut dikemudian hari sebagai berikut :

- 1. melakukan perbaikan/peninggian kereb yang sudah hampir sama tinggi dengan permukaan jalan/aspal.
- 2. memperjelas garis median jalan.
- 3. menertibkan kendaraan yang parkir di sisi jalan agar tidak mengalami kepadatan lalu lintas.
- 4. pihak pengelola pasar sebaiknya menyediakan tempat parkir khusus di area sekitar komplek pasar, agar setidaknya dapat mengurangi jumlah kendaraan yang parkir di badan jalan.
