

CHAPTER V

CONCLUSION AND SUGGESTIONS

5.1 Conclusion

From elaborated the data in the previous chapter based on questionnaire and interview, it is the conclusion:

1. The factors of students anxiety to Speak English are communication apprehension, test anxiety, fear of negative evaluation, self-perception, and classroom environment.
2. The cause of the student's anxiety in speaking English dominantly is when students have low intellectual skills, speech skill deficiencies, and communication anxiety. These are three of the seven aspects that cause communication apprehension. The reason is that their Pronunciation is not proper and still deficiencies in the mastery of vocabulary. So that they do not have the confidence to speak English and fear of their speaking in English are wrong.
3. The strategies to reduce anxiety in speaking English used by the student are Trying to be confident, Trying to relax, Deep breath, Positive thinking, Preparing and understanding the material. The strategies based on theory Kondo and Ling shows that Preparation and positive thinking are the strategies most needed to reduce anxiety in speaking English. Preparation makes their performances running well, and what they are saying can be understood by lecturers and classmate. Positive thinking

makes the students appear confident and feel to make a maximum appearance.

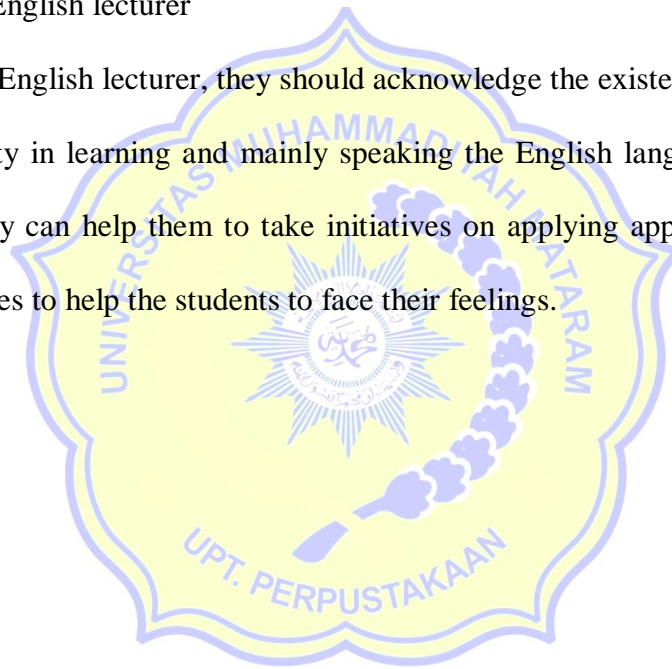

5.2 Suggestions

1. For the students

Hopefully, this study can help the students discovering their anxiety about speaking English by suggested strategies found.

2. For the English lecturer

For English lecturer, they should acknowledge the existence of the feeling of anxiety in learning and mainly speaking the English language. Hopefully, this study can help them to take initiatives on applying appropriate teaching techniques to help the students to face their feelings.
