

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### 5.1 Conclusion

The aims of this study are to discover students reasons of taking English courses and to investigate the impact of English courses toward speaking ability. Based on the result of the research and discussion in the previous chapter, the researcher presented the conclusion based on the data which have been analyzed in the previous chapter chapter 'it conclude that'. Who were taking English courses from the result of the research showed the mostly students have higher score than who students were not. Based on the English courses could influence students in speaking ability. It proved that mostly students have average score is (4) Good based on the qualification of speaking. 'It can be concluded that' the students, who were taking English courses get 83,6 while the students who students were not taking English courses get 48 score.

#### 5.2 Suggestion

In line with “an analysis of students English courses background toward speaking ability at the fifth semester of English Department, Muhammadiyah University of Mataram in the academic year 2020/2021”.

The researcher would recommended several suggestions for the tutor, lecturers/teacher, students and further researcher as follows:

1. The lecturers/teachers should teach the students at the formal institution by using more relaxed and fun methods to reach the target in the learned process.

2. The students should practise every day, and the English courses is one of place to practice speaking and learned language.
3. The further researcher can conduct this topic by focused on other skills in a learned language such as writing, listening, and reading.
