## [REiLA] Editor Decision

2022-03-16 01:54 AM

Dear Dr. IRMA SETIAWAN:

Firstly, we would like to say thank you so much for sending this work entitled "INTERETNIC LANGUAGE RELATIONSHIP IN NUSA TENGGARA BARAT (NTB) AS A SOLUTION FOR IDENTITY CONFLICT RESOLUTION". The topic seems suitable with the journal scopes and there is no serious issue on plagiarism. However, our editor's initial-review manage to see there are some things that you need to adjust on your paper before further process:

- The title seems to need to be adjusted and serve to show the overall content of the study. The title should be simple (Make sure your title is between **5 and 15 words in length**), eye-catching, and include multiple keywords to increase its chances of appearing in database searchers and being cited by future researchers. (Check the example from a published article in our journal)
- There should be a clear purpose(s), instruments, and justified results with global implications highlighted in the ABSTRACT. Kindly add a few more sentences regarding it.
- We truly expect there is a clear novelty from every article submitted to us. We did not see it discussed, mentioned, or presented comprehensively in INTRODUCTION/DISCUSSIONS or any sections in the manuscript. You may highlight it at the end of your introduction section for a better display.

- There should be clear aims, explanations about the "niche" and the significant contribution of the study highlighted in the INTRODUCTION section.
- The findings, analysis, or interpretation seem not clear and are presented very short in the RESULT section. Kindly re-visit it!
- The DISCUSSION should long enough to discuss the essential findings and brings new-insight. Nevertheless, it should have sufficient citations from the previous studies in the related context. This is a must!!!
- The CONCLUSION has not adequately explained the significant contributions of the research and its novelty.
- The references do not yet follow the latest version of the APA citation style. Please use this guide to learn how to cite studies in APA's 7th citation format: <https://www.cite.auckland.ac.nz/2.html>
- The words for the research manuscript should be around 6000-18.000 excluding the references and abstract, while your manuscript only have 5.885 words in total, including references and abstract (kindly check [the author guideline here](#))
- The chart/diagram/ table presented should be clear, editable, using high resolution i.e., PNG format and precise. Nevertheless, do not forget to follow the journal template.

Therefore our decision is: Revision required

This initial review has already helped many authors publish rapidly in our journal. We hope that your article will also have a smooth review and rapid process after taking this action. For a rapid process, we are expecting that the revision of your manuscript will be in our system within **14 days** from now. It means that you need to send the revision before March 31, 2022. However, if you need more time to revise, do not hesitate to let us know, and we will be happy to re-arrange the time for processing your manuscript.

One more thing, when you revise your manuscript, please highlight the changes you make by using the Track Changes function in your Microsoft Word or using bold or colored text, so the editorial board can see the changes you will have made. This means we are only expecting the file in Word with track changes version.

Best Wishes

Dear Dr. IRMA SETIAWAN:

Firstly, we would like to say thank you so much for sending this work entitled "INTERETNIC LANGUAGE RELATIONSHIP IN NUSA TENGGARA BARAT (NTB) AS A SOLUTION FOR IDENTITY CONFLICT RESOLUTION". The topic seems suitable with the journal scopes and there is no serious issue on plagiarism. The title should be simple (Make sure your title is between **5 and 15 words in length**), eye-catching, and include multiple keywords to increase its chances of appearing in database searchers and being cited by future researchers. (Check the example from a published article in our journal)
- There should be clear instruments to collect/ analyze data and major results with global implications highlighted in the ABSTRACT. Kindly add a few more sentences regarding it.
- We are expecting the article can display its structure using IMRAD classical style (Introduction, Method, Result-Analysis/Findings, Discussion) then bind and synthesize it in a compact "Conclusion". Therefore, there should be a Findings section before the Discussion section to be included separately in the article. Kindly understand our policy, the full guideline can be seen here:

<https://journal.unilak.ac.id/index.php/reila/about/submissions#authorGuidelines>

- We also expect there is a clear novelty from every article submitted to us. We did not see it discussed, mentioned, or presented comprehensively in INTRODUCTION/DISCUSSIONS or any sections in the manuscript. You may highlight it at the end of your introduction section for a better display.

- There should be clear explanations about the gaps of the study, and the implication of the study highlighted in the INTRODUCTION section.
- There should be clear and justified steps (Theory/framework used) on how to select sample (sampling techniques), how to collect data (Instrument used), analyze, and interpret data in the METHOD section. Therefore, it will be easy for another study to replicate it.
- The findings, analysis, or interpretation seem not clear and are presented very short in the RESULT section. Kindly re-visit it!
- The DISCUSSION should long enough to discuss the essential findings and brings new-insight. Nevertheless, it should have sufficient citations from the previous studies in the related context. This is a must!!!
- The CONCLUSION has not adequately explained the significant contributions of the research and its novelty.
- The minimum number of current studies (10 years latest) cited and listed in the REFERENCES should not be less than 25 studies taken from journal articles.
- The citation used in the body text should be mentioned in the references list and vice versa
- The references do not yet follow the latest version of the APA citation style. Please use this guide to learn how to cite studies in APA's 7th citation format: <https://www.cite.auckland.ac.nz/2.html>
- The words for the research manuscript should be around 6000-18.000 excluding the references and abstract, while your manuscript only have 5.859 words in total, including references and abstract (kindly check [the author guideline here](#))

Reviewer A:

Apart from the some unfamiliar symbols used and the quality of the language editing that need to be improved, this paper can contribute to the field of conflict resolution using the perspective of (Historical) linguistics.

Therefore, the author need to clarify the symbols used in this study, if possible to have an attachment on the list of the symbols used in this study and then, revised the article based on the comments and suggestion given by the reviewers. Nevertheless, to improve the language quality the author needs to send this manuscript to the proofreader and i would like in two versions in MS.word and PDF both in clean and the track changes version to double check the different version of the content file.

Recommendation: Revisions Required

Reviewer B:

It seems okay. The revision made by the author is acceptable. However, the editing and language quality needs to be improved. Therefore I suggest sending the article to the professional proofreader (with certificate) before publication.

Recommendation: Accepted with minor revision and proofreading
