

## **BAB V**

### **KESIMPULAN DAN SARAN**

#### **5.1. Kesimpulan**

Berdasarkan hasil analisa dan pembahasan, maka dapat disimpulkan bahwa:

- a. Dari hasil penilaian indeks kinerja daerah irigasi menurut Permen PU No.32/PRT/M/2007 dapat dilihat indeks kinerja daerah irigasi pada daerah irigasi Parung sebesar 40.51% dari nilai indeks kondisi optimum 63.47% (Permen PU No.32/PRT/M/2007), dikatakan indeks kinerja daerah irigasi Parung kurang dan perlu diperhatikan.
- b. Upaya yang dapat dilakukan untuk meningkatkan kinerja jaringan irigasi Parung dengan memperbaiki jaringan irigasi yang sudah ada, agar jaringan irigasi berfungsi secara maksimal dalam mengalirkan air. Meningkatkan sosialisasi kepada para petani agar mengikuti aturan tanam yang ada untuk mengurangi gagal panen dan menjaga jaringan irigasi.

#### **5.2. Saran**

Adapun saran yang ingin disampaikan berkenaan dengan penyusunan skripsi ini adalah sebagai berikut :

- a. Diharapkan kepada instansi terkait agar dilaksanakan rehabilitasi jaringan irigasi Parung untuk meningkatkan kinerja daerah irigasi Parung. Berdasarkan analisis yang telah dilakukan kondisi kinerja daerah irigasi Parung kurang dan perlu perhatian.
- b. Diharapkan kepada masyarakat untuk bisa menyadari kerugian yang timbul akibat pencurian, perusakan bangunan-bangunan infrastuktur, atau membuang sampah di saluran yang menyebabkan penurunan kinerja pada daerah irigasi Parung.

- c. Bagi peneliti selanjutnya, analisis evaluasi indeks kinerja daerah irigasi dapat dilakukan di beberapa daerah irigasi untuk memberikan informasi kondisi kinerja di beberapa daerah irigasi sebagai pembanding untuk menentukan skala prioritas daerah irigasi yang perlu perhatian dan penanganan lebih dulu.
- d. Dalam pelaksanaan survey inventarisasi untuk data evaluasi dilakukan bersama-sama dengan ketua GP3A, P3A atau pengamat bendung terkait sebagai penyampai informasi pada daerah irigasi tersebut agar data inventarisasi yang didapatkan
