

CHAPTER V

CONCLUSION AND SUGGESTION

5.1. Conclusion

The usage of Google Classroom for writing in online learning is beneficial for a variety of pupils, according to the research's findings. Students who use Google Classroom are better able to access reading materials and videos about the subject being studied and write in a more organized and efficient manner. Additionally, using Google Classroom enables students to interact with their teachers and peers more effectively, which aids in the development of their writing skills by giving them constructive criticism and advice.

However, this survey also recognized the challenges that students confront. For some students, using Google Classroom is difficult due to accessibility issues and the need for more structured instruction. As a result, decision-makers in education and policy need to take.

5.2. Suggestion

The integration of Google Classroom in writing instruction yields a multitude of advantages for diverse students engaged in online learning. Employing Google Classroom facilitates a more organized and efficient approach to writing, enhancing students' access to pertinent reading materials and instructional videos associated with the subject matter. Furthermore, the utilization of Google Classroom streamlines communication between students and their educators and peers, culminating in an enriched writing experience through valuable input and feedback.

Nonetheless, the study also brought to light challenges encountered by students. Notable hindrances encompass accessibility limitations and the demand for more structured guidance, impeding some students' seamless utilization of Google Classroom. Thus, educators and policymakers must factor in these aspects when shaping comprehensive and all-encompassing online learning strategies that cater to the diverse needs of the student body.

Consequently, the outcomes of this investigation furnish pivotal insights for educators and policymakers, equipping them with essential knowledge to craft inclusive and efficacious online learning strategies. Additionally, these findings provide a deeper comprehension of the nuances involved in incorporating Google Classroom into the writing learning process, thereby contributing to its heightened effectiveness in the realm of online education.

Students' perception

How was your experience using Google Classroom in online writing classes?

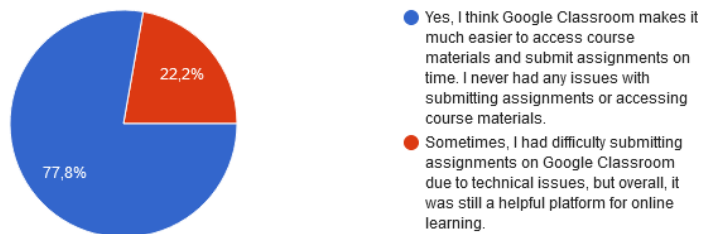

9 jawaban

Do you feel that the Google Classroom feature makes it easier for you to access materials and submit assignments?

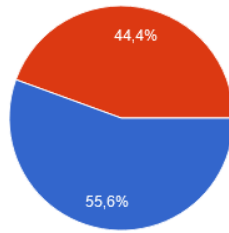

9 jawaban

How do you think using Google Classroom can improve self-study skills?

Salin

9 jawaban

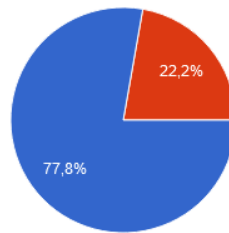

- Using Google Classroom can improve self-study skills because it allows for easy access to all the necessary resources and materials in one place. I found it easier to manage my time and work more independently using the p...
- I don't think that using Google Classroom alone is enough to improve self-study skills. It requires self-motivation and discipline to use the platform effectively.

How can the comments and notification features on Google Classroom help you improve your study discipline?

Salin

9 jawaban

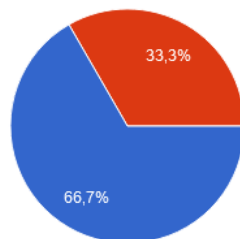

- The comments and notification features on Google Classroom were helpful in improving my study discipline. The feedback from my instructor helped me improve my writing skills, and the notifications hel...
- I found the notifications on Google Classroom to be overwhelming at times, and it was easy to miss important messages or feedback from my instructor.

In your opinion, can using Google Classroom improve writing skills, especially in terms of grammar?

Salin

9 jawaban

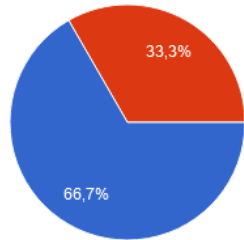

- Yes, I think using Google Classroom can improve writing skills. The platform provides many resources and tools that can be used to improve writing skills.
- Using Google Classroom in writing class did not improve students' grammar

Do you have problems using Google Classroom? What do you expect from using the platform in the future?

Salin

9 jawaban

- I did not encounter any significant problems using Google Classroom. I found it to be user-friendly and helpful for online learning.
- I had some technical issues with Google Classroom that affected my ability to submit assignments on time, but it was not a significant problem overall. In the future, I hope the platform can become more reliable and efficient.
